

ENERGY POLICY

Dunlop Oil & Marine aims to produce its products in a responsible manner, helping to ensure a sustainable resource base for future generations.

We are committed to:

- a. Increasing our energy efficiency
- b. Investing in clean, energy efficient technologies
- c. Reducing environmental impact arising from our consumption of energy

In order to achieve this, the company will:

- * Establish a measurement and targeting system
- * Use alternative fuels and renewable energy where cost effective
- * Increase awareness of energy efficiency amongst all employees
- * Ensure that all relevant employees receive training in energy awareness and efficiency improvement techniques
- * Implement all cost effective energy efficiency measures
- * Ensure that energy efficiency and carbon emissions are considered in business decisions
- * Invest in cost effective, clean technology
